Revision Date 06-12-2015 Revision Number 1

### SECTION 1 Identification of the substance/mixture and of the company/undertaking

Product identification used on label	
Product identifier	3003
	TECTYL® 164
Details of the supplier of the safety	Daubert Chemical Company
data sheet	4700 S. Central Avenue
	Chicago, IL 60638
	708-496-7350
Emergency telephone number	Chemtrec: (800) 424-9300
Relevant identified uses of the	Corrosion Preventive Compound
substance or mixture and uses	
advised against	

### **SECTION 2 Hazards identification**

Classification of the chemical in accordance with paragraph (d) of §1910.1200;

GHS Hazard Symbols

GHS	Skin Corrosion/Irritation Category 2
Classification	Serious Eye Damage/Eye Irritation Category 2A Flammable Liquid Category 3
	Specific Target Organ Systemic Toxicity (STOT) - Single Exposure Category 3
Signal Word	Warning
Hazard	Flammable liquid and vapour.
Statements	Causes skin irritation.
	Causes serious eye irritation.
	May cause respiratory irritation.
	May cause drowsiness or dizziness.
Precautionary	
Statements	
Prevention	Keep away from heat/sparks/open flames/hot surfaces. – No smoking. Ground/bond container and receiving equipment. Use explosion-proof equipment. Use only non-sparking tools.
	Take precautionary measures against static discharge. Avoid breathing dust/fume/gas/mist/vapours/spray. Wash thoroughly after handling.
	Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.

Response	IF ON SKIN: Wash with plenty of soap and water. IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
	IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable
	for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact
	lenses, if present and easy to do. Continue rinsing.
	Call a POISON CENTER or doctor/physician if you feel unwell.
	Specific treatment: None known
	If skin irritation occurs: Get medical advice/attention.
	If eye irritation persists: Get medical advice/attention.
	Take off contaminated clothing and wash before reuse.
	Use dry chemical, water fog, $\tilde{CO2}$ , foam or sand/earth for extinction.
Storage	Store in a well-ventilated place. Keep container tightly closed.
	Store in a well-ventilated place. Keep cool.
	Store locked up.
Disposal	Dispose of contents/container in accordance with
	local/regional/national/international regulation for hazardous wastes.

### **SECTION 3 Composition/information on ingredients**

Chemical Name	CAS #	%
Hydrotreated light distillate (Petroleum)	64742-47-8	30 - 50
Ethylene glycol mono-n-butyl ether	111-76-2	1 - 5

Note: Specific chemical identities and/or exact percentages have been withheld as a trade secret.

SECTION	4 First	aid measures
---------	---------	--------------

Inhalation	If symptoms are experienced remove source of contamination or move victim to fresh air and obtain medical advice.
Eyes	Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to
	prevent chemical from transferring to the uncontaminated eye. Get immediate medical
	attention.
Skin Contact	Wash with soap and water. Get medical attention if irritation develops or persists.
Ingestion	Do not induce vomiting and seek medical attention immediately. Provide medical care provider with this SDS. If vomiting occurs, lean victim forward to reduce risk of aspiration
	into lungs.
Note to Doctor	Treat symptomatically.

### **SECTION 5 Firefighting measures**

Extinguishing mediaUse alcohol resistant foam, carbon dioxide, dry chemical, or water spray<br/>when fighting fires. Water or foam may cause frothing if liquid is<br/>burning but it still may be a useful extinguishing agent if carefully<br/>applied to the fire. Do not direct a water stream directly into the hot<br/>burning liquid.

#### Revision Date 06-12-2015 Revision Number 1

Fire and/or Explosion Hazards Fire Fighting Methods and Protection Hazardous Combustion Products	Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back.Empty containers that retain product residue (liquid, solid/sludge, or vapor) can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose container to heat, flame, sparks, static electricity, or other sources of ignition. Any of these actions can potentially cause an explosion that may lead to injury or death. Do not enter fire area without proper protection including self-contained breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Use appropriate methods for the surrounding fire. Hydrocarbons, Sulfur compounds, Smoke, Oxides of carbon, Toxic gases		
SECTION 6 Accidental release measures	3		
Personal precautions, protective equipment and emergency procedures Methods and materials for containment and cleaning up	Exposure to the spilled material may be irritating or harmful. Follow personal protective equipment recommendations found in Section VIII of this SDS. Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill.		
SECTION 7 Handling and storage Precautions for safe handling Conditions for safe storage, including an incompatibilities	<ul> <li>Mildly irritating material. Avoid unnecessary exposure. As with all chemicals, good industrial hygiene practices should be followed when handling this material. Wash thoroughly after handling. Do not get in eyes, on skin and clothing. Ground and bond containers when transferring material. "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Use spark-proof tools and explosion-proof equipment. Do not use pressure to empty container.</li> <li>y Store in a cool dry place. Isolate from incompatible materials. Keep container closed when not in use. Keep away</li> </ul>		
Incompatible materials	from heat, sparks, and flame. Strong oxidizing agents, Strong alkalies		

Revision Date 06-12-2015 Revision Number 1

### SECTION 8 Exposure controls/personal protection

<u>Control parameters</u> <u>Chemical Name</u>		ACGIH TLV	ACGIH STEL	<u>OSHA PEL</u>
Hydrotreated light distillate	e (Petroleum)	212 ppm (8 hrs)		
Ethylene glycol mono-n-bu	ıtyl ether	20 ppm TWA; 96 mg/m3 TWA		50 ppm TWA; 240 mg/m3 TWA
Engineering Measures	handling or using this designed to meet the enclosures, local exh levels below recomm	ation or other engineering s product to avoid overexp OSHA chemical specific aust ventilation, or other e eended exposure limits	ossure. Engineering c standard in 29 CFR 1 ngineering controls to	controls must be 910. Use process o control airborne
Respiratory Protection	-			
Eye Protection	Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available.			
Skin Protection Gloves	Not normally consider practice good persona	ered a skin hazard. Where al hygiene and wear a barr ands and other exposed are when leaving work.	use of product can re rier cream and/or imp	sult in skin contact, ervious surgical

## SECTION 9 Physical and chemical properties (Typical, not specification)

Physical State	Liquid
Color	Black
Odor	Solvent Odor
Odor Threshold	No data available
рН	No data available
Melting Point, °C	No data available
Boiling Point, °C	No data available
Flash Point	>= 100 °F( 38 °C)
Evaporation Rate	No data available
Flammability (Solid, Gas)	No data available
Lower Flammable/Explosive Limit,	No data available
% in air	
Upper Flammable/Explosive Limit,	No data available
% in air	
Vapor Pressure	2 mmHg
Vapor Density	>1 (Air=1)
Specific Gravity @ 25°C	0.89
TECTYL® 164

Revision Date 06-12-2015 Revision Number 1

Solubility in Water		Revision Number 1	
Solubility in Water		ble; 0-1%	
<b>Octanol/Water Partitic</b>	on Coefficient No data	available	
Autoignition Temperat	ture No data	available	
Decomposition Temper	rature No data	available	
Viscosity	50 sec, Zahn		
Volatiles, % by weight	No data	available	
VOC, lb/gal	3.34		
VOC, grams/liter	400.6		
SECTION 10 Stability	and reactivity		
Chemical stability		Stable under normal conditions. Hazardous polymerization will not occur.	
Possibility of hazardou	a reportions		
r ossibility of hazar dou	sreactions	Under normal conditions of storage and use, hazardous reactions will not occur.	
Conditions to avoid		Contamination. Elevated temperatures.	
Conditions to avoid Incompatible materials	2	Strong oxidizing agents, Strong alkalies	
Hazardous decomposit		Decomposition and hazardous decomposition products are	
mazai uvus uccomposit	ion products	unlikely.	
ECTION 11 Toxicolog	ical information		
Likely Routes of Entry		Inhalation, Skin contact, Eye contact	
	ally Affected by Exposure		
0 0		Kidneys, Liver, Nervous System, Lungs	
Chemical Interactions That Change Toxicity Medical Conditions Aggravated		No chemical interaction known to affect toxicity.	
		Skin contact may aggravate existing skin disease, Respiratory	
-	-	disease including asthma and bronchitis, Lung disease
